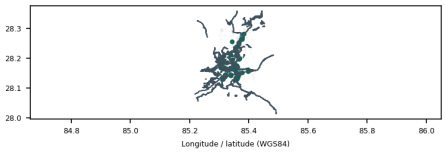
Situation report

Run: f240191c9c1371629cc0f0282a86f4ee55937f2c9ebc60a2beabb67400fc5eb3
Evidence: deb5c87bcda3b61855ba6c44389b20d636fce7805148511ad50360cb6fd1a455

not yet reviewed by a native speaker

Satellite times are not event times. Unknown observations never imply zero impact.



Blue: possible water; ochre: disturbance; grey: unobservable; dark lines: roads; green points: settlements. Map source claims: map-claims.json.
Run layers only; no travel-condition assessment.

Area / event / processing

Area / event / processing: 2083-05-10 BS | 2026-08-26 (date only) **[C009]**

Run processing status: complete **[C012]**

Satellite acquisitions and offsets

Recorded method and thresholds

decrease_db: 3 [C1657]; max_slope_deg: 12 [C1660]; post_db: -16 [C1667]

Recorded method and thresholds: baseline **[C247]**

Coverage and inclusion sensitivity

Change-observation coverage (%): 93.96561116785836 Hypothetical scenario: 2 **[C1680]**

Post-observation coverage (%): 99.08120531154239 Hypothetical scenario: 2 **[C1681]**

Observed hazard areas

Possible disturbance area: Area (m²): 189600.0; Observed coverage (m²): 220781600.0 **[C1682]**

Possible water area: Area (m²): 0.0; Observed coverage (m²): 220781600.0 **[C1683]**

possible debris (unvalidated): Area (m²): 43600.0; Observed coverage (m²): 220781600.0 **[C1686]**

Unobservable area: Area (m²): 14178400.0; Observed coverage (m²): 234960000.0 **[C1687]**

Potentially affected mapped assets

Settlements with uncertain access: 23 Hypothetical scenario: 2 **[C60598]**

Potentially exposed buildings: 102 Hypothetical scenario: 2 **[C60601]**

Modelled disconnected settlements: 22 Hypothetical scenario: 2 **[C60602]**

Potential primary-care disconnections: 0 Hypothetical scenario: 2 **[C60603]**

Potentially affected links: 121 Hypothetical scenario: 2 **[C60606]**

Possible mapped trail access: 14 Hypothetical scenario: 2 **[C60607]**

Hypothetical access scenarios

Settlements: Mapped feature ID: settlements:cluster/0 Hypothetical scenario: 2 Evidence status: unknown; baseline: mapped connection; 1: mapped connection; 2: mapped connection; 3: mapped connection; 4: no mapped connection **[C60608]**

Settlements: Mapped feature ID: settlements:cluster/1 Hypothetical scenario: 2 Evidence status: unknown; baseline: mapped connection; 1: mapped connection; 2: mapped connection; 3: mapped connection; 4: no mapped connection **[C60609]**

Settlements: Mapped feature ID: settlements:cluster/11 Hypothetical scenario: 2 Evidence status: unknown "near सानो भार्खु"; baseline: mapped connection; 1: mapped connection; 2: mapped connection; 3: mapped connection; 4: no mapped connection **[C60610]**

Hypothetical scenario 1: Recorded asserted closures only **[C62217]**

Hypothetical scenario 2: Adds SAR observed-change and corroborated links (primary) **[C62218]**

Hypothetical scenario 3: Adds corroborated links; subset of scenario2 **[C62219]**

Hypothetical scenario 4: Adds possible and unknown links (worst case) **[C62220]**

Limitations

Satellite acquisition times differ from event time; offsets use the supplied event-date boundary. **[C62221]**

DEM flow paths are terrain traces, not inundation forecasts or travel recommendations. **[C62222]**

Recorded layover/shadow masks are approximate; unobservable areas remain unknown. Fused unions span several satellite dates; feature times are earliest flagging observations. **[C62223]**

Optical-only change belongs to the worst-case scenario; long-gap signals are suppressed. The recorded NDBI threshold is unused; optical support does not validate possible debris. **[C62224]**

Scenario closures and disconnections are hypothetical, not confirmed conditions. **[C62225]**

Mapped settlements, roads and destinations may be incomplete; unmapped assets are excluded. **[C62226]**

Detection, exposure and snapping depend on recorded spatial resolution and thresholds. **[C62227]**

Complete evidence and source limitations: report-facts.json / report-claims.csv. Bracketed references resolve to full claim IDs in the export.
